

9
Angelus Britannicus :

A N

EPHEMERIS

For the Year of our Redemption

1684.

Being the *Bissextile* or *Leap-Year*, and
from the Creation of the World, as
some suppose, 5633.

And from the Burning of London 18.

Amplified with

Astrological Observations from the
Sun's Ingress into *ARIES*, and the
other Cardinal Points; with an Account of the
Eclipses, Conjunctions of the Superiors, of
the late Comets, and other Configurations of
the Heavenly Bodies.

Calculated for the Meridian of the
most famous City of *London* where the
Pole Arctick is Elevated above the Horizon 51
Degr. 32 Min. but may indifferently serve for
ENGLAND, SCOTLAND and *IRELAND*.

By *John Tanner* Student in *Physick* and *Astrology*.

The Twenty eighth Impression.

Agunt non Cogunt.

*Astra in Voluntatem hominis & liberum arbitrium
indirectè & per accidens agunt; dum directè
temperamentum significant & disponunt, sensusq;
in consensum trahunt.*

London, Printed by *E. Horton*, for the
Company of Stationers 1684.

a Table of the exact time of the Moons coming to the South for every day of the first six Months of the Year 1684, serving to find out more exactly the time of high water in most of the eminent Ports in England, Scotland, and Ireland, and other Ports adjacent.

To leave the Arcadian Soyle Saturn would fair,
Rough Mars opposing turns him back again:
The Air disturb'd by their Malignant Beams,
Always their influence do cause extreams.
And in Mens minds both Spight and Hatred Sow,
Which cause Strife and Contentions here below.

To leave the Arcadian Soyle Saturn would fair, Rough Mars opposing turns him back again: The Air disturb'd by their Malignant Beams, Always their influence do cause extreams. And in Mens minds both Spight and Hatred Sow, which cause Strife and Contentions here below.

Heavens Glory stained by the Dragons Thyle,
Beneath our Horizon his Face doth Vaile.
The effects are Inaspicious, though Jove
Apply unto the Sun with perfect Love.

It scarcity portends, or some such thing,
Prodigious motion of some mighty King.

March 1684.

Month days

The two Infortunes lovingly apply,
Accompan'd with Stars both hot and dry,
Such weather fits the Season, and doth bring
The Blessings of a pleasant fertile Spring.
The fortunes their moist dews on us distill,
But all depends on the Creators will.

June 1684.

Month Days- Fair Proserpine (by Earths dark Shade) her face
Obscured is; hence slanders and disgrace
Abuse good men, and wrong the innocent:
Such force hath malice, such a curst intent;
Untimely deaths to men of worth ensue,
If Authors ancient Saws prove to be true.

July hath xxxi days.

The Stars great Potentate, the Heart of Heaven,
 Defaced is by th' lowest of the seven :
 The people under Cancer feel the sting
 Of its effects, which doth much sorrow bring :
 Amongst the vulgar strange Diseases rages,
 And foul ones too, more than in former Ages.

July 1684.

Month Days

When mutinous humours let mens furies rage
 Into revenge, alas! who can assuage
 The Flames of anger? When men do aspire
 Beyond their Bounds, passion's the worst of fire.
 And every man doth know, when force prevails,
 That Justice must not dare to use her Scales.

August 1684.

Month Days.

Whilst we ith British iste have nought to say,
But thank Heaven for past peace, wish to enjoy
The same still, pray for good Harvest Weather,
Whilst Saturn and the Sun are near together;
And whilst Heaven fills our Earth with such increase,
Let us all study to preserve our peace.

September hath xxx days.

The amorous Venus with her Sparkling eyes
 Saturn's frowns would disperse, that dark the skies,
 Warm his cold fancy, and his frigid veins
 Enliven, and wipe off's malicious stains;
 But all in vain (poor Lady) surely be
 Is Saturn still, and Saturn e're will be.

September 1684.

Month Days.

Gladly would she the morning beautifie,
But that old Saturn darkeneth the skie;
Till Sol and Jove conjoin, and clear the Air,
And glad the Seeds man, cause the Weather's fair:
The Planets mutual Rays do promise well,
A Season good, this Month, they do foretell.

October 1684

Month Days.

High winds, prodigious Gusts and turbulent,
Before their influences are quite spent :
In some parts Coruscations and Thunder,
Though it be late, or else it is a wonder ;
Venus steps in, and with her milder rays
Allays the Storms, gives moist and cloudy days:

November hath xxxi days.

France seemeth much concern'd, and Spain also,
In these effects, and many places more;
Sad times present themselves, and Peace is drown'd
In Seas of Blood; Impiety is crown'd;
Hear, hear, O Heaven! dispel thy bleeding power,
Cool the Worlds hate with a repenting shower.

November 1684.

Month Days. The two Benevolents shew their good will,
And would hatred allay and peace instill;
And by their homogeneal temperament,
They give a wholesome Air with content
To Man and Beast; till Saturn squares the Sun,
Alters the Scene before the Month is done.

Astrological Observations, 1684.

The Table of the Ports, with the Hours and Minutes to be added to the time of the Southings, gives the exact time of high-water.

	H. M.
Queenborough, Southampton, Portsmouth, Isle of Wight	00 00
Rochester, Malden, Aberdeen, Redland, Westend of the Nore	0 45
Graveland, Downs, Rumney, Silly, Blackness	1 30
Dundee, St. Andrews, Lisbon, Bell-Isle, Holy Isle	2 15
London, Tinnmouth, Hartlepool, Whitebay, Amsterdam	3 00
Berwick, Flamborough head, Bridlington bay	3 45
Severn, Leith, Dunbar, Kingsale, Calice, Creek	4 30
Newcastle, Hull, Falmouth, Dartmouth, Lizard	5 15
Plimouth, Weimou h, Hull, Lynn, Lundy, Holmes	5 00
Bristol, Eoulness, at the start	5 45
Milford, Bridgwater, Lands end, Wate Ford, Texel	7 30
Portland, Peterport, Harflew Hague, Dublin	8 15
Pool, Catneis, O kney, Isle of man, Bass Island	9 00
Needles, Laith, North and South Foreland	9 45
Yarmouth, Dover, Harwich, Calice Road, Bullein	10 30
Rye, Winchelsea, Goree, Thames, Rhodes	11 15

To find the time of High-Water at any of these Ports, seek the Hour and Minute of the Moons Southing on that day, by the Table of the Moons Southings, to which add the Hour and Minute you find against the Port; which giveth the time of High-Water. If the Aggregate of the Hours exceed 12, deduct 12, and the Residue is the time of High-Water. If the time found be in the Morning, and you would find what difference in time there is between that and the Evening Tide, see what difference there is between the time of the Moons Southing that day, and the day following, take half of that difference and add it to the Morning Tide, and it gives you the time of the Evening Tide that day; and so of the contrary, if you find the Evening Tide, and would find the precise time of the Morning Tide following. Having so often illustrated these Tables by examples, I need not trouble my self or the Reader with any examples now. Observe, That at the Spring Tides it sheweth one Point of the Compass, more than at the Neap-tides. High Winds and Land-Flouds do often cause some variation; but this is the most exact Rule that can be given.

The Table of the Moons Southing serves also to find the Hour of the Night by a Sun-Dial; thus Observe when the Moon shineth upon a Sun-Dial, where the Shadow falleth; and if the shadow wanteth of the Line 12, subtract the Hours and Minute that it wanteth of 12 from the time of the Moons Southing, and it gives you the Hour of the Night. If the shadow be past, add the Hours and Minute that it is past to the Southing, and that is the Hour of the Night.

ASTROLOGICAL OBSERVATIONS for the Year 1684.

You whose smooth measures, and more lofty strains,
Whose smiling fortunes doth reward your pains:

Court you the higher Orbs, Glories presage,
Proclaim the Triumphs of the golden age.
Whilst my dull muse, in dust and sackcloth lies,
Contemplates past and present miseries:
What the dire heavenly influx doth foreshow,
And actions correspondent here below.

Do not awaken such as sleep secure.
Thy admonitions they will not indure.
As God commands, so do thy duty render
To thy superiors; Be not an offender:

And let thy foes their malice spend in pain,
Like silly Dogs, bark at the Moon in vain.

Of the Winter-Quarter.

THis quarter commenceth with the Suns entrance into
the Tropical sign of *Capricorn*, on the 11th of *De-*
cember 1683. being *Tuesday*, at 2 hours and 47 minutes
past noon, at which time nine degrees and 17 minutes of
Aquary, is upon the cusp of the Midheaven, and 14 de-
grees and 45 min. of *Gemini*, or the *Twins*, upon the *Horo-*
scope of *London*. The two superiors are under the Earth
in the fifth house. *Venus* and *Mercury* just setting in the
west, *Mars* and the *Moon* in the Mid-heaven. We have
hopes soon countermined by fears: sometimes we hope
that the sober and well-minded men, who wish well, and
labour for the peace and tranquility of *Europe*, will pre-
vail: On the other hand, we are in continual fears of
the Treachery of Embassies, and seeming friendly Trea-
ties and Missives, of the double dealing and underhand
contrivances of a generation of *Vipers*, raised and permit-
ted by Gods Providence, to be a plague to the World.

C

The

The Effects of the last Solar Eclipse, seems now to be in the height of it Operation. Which happily may spend its influence upon many Clergy-men, if not upon Religion it self: It portends to some people and place, Famine, Sickneſs and Peſtilent diſeaſes. *Proclus* ſaith. *publici moris, & luctus materiam prabet.* It preſageth publick ſorrow and mourning: & happily to men of the higheſt rank and quality at leaſt thoſe that are above the ordinary or middle ſort, eſpecially thoſe that have *Aquarius. Leo, Scorpio,* or *Taurus*; in their *Hoſcope*, and to thoſe Countries, Kingdoms or Cities, that are under the ſigns aforeſaid; and here let me advertiſe my Reader, that in my laſt *Ephemeriſ*, 1683. the Calculation, or at leaſt a Synopſis thereof, was left out, with many other things, which I muſt attribute to the preſumption of the Printer, to confine my Pen to a conformity with his Letter.

Of the Spring-Quarter.

WE take the time of the Springs commencement from the entrance of the *Sun* into the firſt Scruple of the Equinoctial ſign *Aries*. where it is ſuppoſed he was in, at the Radix of the Worlds Creation. The time thereof, every man gives an account of according as he ſtands affected to this or that *Aſtronomical* Author and his Tables. Mr. *The. Street* hath with indefatigable pains and induſtry corrected the *Paralax* and *Refraction* of the *Sun*, which cauſeth a difference ſometimes of 7 or 8 min. in the *Sun* place, and by that means differs ſomewhat conſiderably in the time of the vernal *Equinox* from other *Aſtronomers*; he is now upon the composing of larger Tables *Aſtronomical*, which will be more accurate, and more eaſie than any formerly compoſed, and directly conducing to the diſcovery of the true *Longitude*, compleating *Aſtronomy*, *Geography*, and *Navigation*, a work ſo deſirable and beneficial not only to this, but all Kingdoms and States of the habitable World; and ought to be recommended to all ingenious and ſober men, that are lovers of Learning.

and

and the welfare of their Country, to contribute their Assistance in following the examples of those worthy Knights and Gentlemen, that have already subscribed to his Assistance in so good a work, which cannot be sufficiently gratified and rewarded. This as an Advertisement I thought fit to present to my Reader, and now return to the Figure of the vernal Ingress.

Here is a smiling face of Heaven, and as if the amicable saies of the Planets would proclaim a *Jubilee* or *Halicion* days to our British *Isle*: But common and double-bodied signs occupy the Angles, and an ambodextrous party do what they can to impede our wished-for happiness and tranquillity, and the peace of all *Europe*.

Mars seems to have most dominion of this quarter, powerful in his own house, and in *Conjunction* with *Venus*. Benevolent *Jupiter* Lord of the tenth, beautifying the *Horoscope*, and in reception with *Mercury* Lord thereof, tho both in their detriment, which intimates a seeming better understanding between Princes and their Subjects than formerly, or the common people more subjected to the Laws, (in some places to the Wills) of their Princes, than in former times. The Government of *England* seems to appear in more splendor than in former times, the Clergy more exalted, the Soldiery or marshal-power more formidable, and the Treasury more considerable. *Boonatus* saith of *Mars* his Position in *Aries*. *significat ventos validos, & multas & varias mutationes aeris in partibus orientalibus: & significat bellum in eisdem partibus, qui fuerint in divisione Arietis, & malum futurum, & iram atq; injuriam, & rexam: & significat vltoriam in bello civibus illarum civitatum & habitatoribus illarum regionum super inimicis eorum, qui venerint de aliis partibus ad illas, causa nocendi eis, &c.* and much more saith he, which for brevity sake I omit. In *English*, thus; he signifieth high Winds, many and various Mutations of the Air in the *Eastern* parts; it signifieth Wars in those parts under the division of *Aries*, Evils Threatned, Contentions

and Injuries; and it signifieth Victory in War, to those people and inhabitants that are under *Aries*, over their enemies, that shall invade them, or desire to wrong them. It signifieth those Princes so signified, shall be inclined to war-like exploits; that Ancient men and Fathers shall instruct the youth and their sons in martial exploits, and exercise of Arms And if *Mars* be well posited, it signifieth to the Citizens and Inhabitants aforesaid, and their King, Victory over their Enemies, whoever they be shall contend with them. It signifieth the greatness of the spirit of their King, and that he shall be mutable and subject to vary in his actions and apprehensions of things: It signifieth that his subjects, the commons, shall love and obey him. His *Somb* Latitude signifieth, Thunder, Lightning and fiery Corruptions, and his Occidentality may procure sudden showers, which Judgment receives some Confirmation from his *Conjunction* with *Venus*, altho their being in dry and fiery signs, seem to indicate the contrary, or at least to moderate it by a warm and grateful serenity. The *Conjunction* of *Mars* and *Venus*, hath signification of many Adulteries, and more than ordinary Fornication, crimes too much practised in this age. *Saturn*, *Mars* and *Venus* in *Trine* to each other, seem to offer accommodation and ending of differences, and considerable controverted affairs, but let time discover the reality or falsity of the intrigues.

We must also take notice, how the present positions of Heaven have relation to the great and minor Conjunctions, and of the late *Comets*, and what judgments are to be deduced from them. It hath been well observed by all the most Learned in Astrology, that every entrance and return of the Planets superior, into the *Trigon*, hath been ever attended with some great change of Empire or Dominion of the World, and for the most part attended with some eminent dispensation of Gods providence as to Religion and Religious Worship, and other very eminent

nent and remarkable mutations. And it is the more to be observed, that every return into this *Trigon*, hath been celebrated in the sign *Sagittary*, which Astrologers say, is the house of *Jupiter*, who is the patron of Justice, Peace, Tranquillity and Religion; it were too great a task to shew you the Eminent mutations that have attended this *Trigon*, as the converse with History, and some Authors Observations will inform the Inquisitive and Judicious Reader. We are under the eight entrance, and seventh return which happened in the year 1603, under which we now are, and must continue, at least our Successors, till the year 1802, which will be 118 years from this present year 1684. What eminent changes there hath been in *Europe*, both in Church and State, especially in *England*, few intelligent persons are ignorant of; we are under the Effects of the fifth Conjunction, since the last return of this *Trigon*, and it is a triple one, and one that will be attended with Eminent mutations & catastrophes, wars, commotions, mortalities, dearths, and many heavy Vengeances upon those Nations & Kingdoms, upon whom providence shall dispose the Effects. And it is not unprobable, that many Schisms, Heresies, Sects or Dissenters from the publick profession, on Religion established by Law, shall receive in all, or most Nations of *Europe*, such restrictions as may cause great heart-burnings, grumbings and discontents, that may endanger the Peace of some Princes in *Europe*, great disputes, and high Animosities among the common people for the loss of their Ancient Customs, Charters, and Franchises in many parts of the World. The Lord deliver the City of *London* from fires, and she and the Nation from the plague of Pestilence, or any other epidemical distemper or severe Judgment. The Soldiers in general, or the Soldier of most Nations, seem to be rampant, and their actions disliked by the generality of the people, hence arise Fraies, Contentions, and Murtherous mutinies, and a desperate resolution among the people to repel force by force, and begin to

see the grounds of the mischiefs they have laboured under, and repent their forward compliance in binging on those Evils which now they complain of. The *Turk* seems to oppress the Empire, and the poor people complain of the pressures they labour under, both from their Enemies, and those that should take care to prevent or remove their heavy burthens. Without doubt many places of the Empire will feel the severe and heavy hand of Providence. Nor are the Princes of *Italy* free from the dire influence impending, no not the See of *Rome* it self. From the pontifical Chair to the lowest traveling; that Government being subjected to great Distempers, Disorders, and Confusion; nor at one time or other is any Kingdom or City under the fiery *Trigon* exempt from the influence of the *Conjunction*. So will it fare also with those peop'e under the sign opposite and in quadrature, viz. *Aquarius*, *Taurus* and *Scorpio*, the places subjected to those signs for brevity like *Rome*. It will not be amiss if we have recourse to History of the rise and growth of the Government of *London*, her Charters and Franchises, the Interruptions, and Eclipsings of the same, and under what *Trigons*, or *Constellations* these rises and mutations have happened Before the reign of *Richard the first*, the City of *London* was governed by *Portgraves*, who in the first year of his reign, and in the year of our Lord, 1187. Constituted two *Bailiffs*, some say a *Mayor* and two *Sheriffs*, which *Fabian* denies; how ever the City then began the State or form of Government, and to be divided into Fellowships and Corporations, which was under the last *Conjunction*, or Period of the earthly *Trigon*, celebrated in *Virgo* in the year 1186. and about their Sexile Application.

But the Government, as the form now is, by a *Mayor*, two *Sheriffs* and *Common Council*, was settled in the tenth year of King *John*, Anno Christi 1209. three years after the entrance of the Airy Triplicity, near the Sextiles also, which *Conjunction* was celebrated in *Gemini*, which all Authors agree to be the Ascendant of *London*. But

But yet had not the City arrived to the Vertical point of her grandeur, because they had not yet attained to the Priviledge or right of Election of their own Officers. But in the 25 year of King *Henry* the third, and in the year of our Lord 1241. *Aldermen* were first chosen in the City of *London*, which had the rule of the City, and the Wards thereof, and were yearly changed, as the *Sheriffs* have been since; at this time the Citizens have a Charter to be Toll-free through all *England*, and many other Priviledges; and no *Sheriff* to continue in his Office longer than one year. This was during the Effects of a Conjunction in *Aquary*, and near the Sextile Aspect. In the 54 year of this King, they attain a higher step of Priviledges, for he Grants the Choice of the *Mayor* and *Sheriffs* to the Citizens Election; this seems to be near the height of their Charter and Priviledges, this was in the year of our Lord 1270 under a Conjunction in *Gemini*, the Superiors applying from the Quartile Aspect to the Trine. In his time, and under this Conjunction, was *Magna Charta*, and *Charta de Foresta* ratified and confirmed by the King, his Nobles and Bishops, with burning Tapers in their hands, pronouncing the terrible Sentence of Excommunication against the infringers of the same.

In the 27 year of *Edw.* the first, the Charters were again confirmed with the Omission of the clause, *Salvo jure coronæ nostræ*, in the year 1299. under a Conjunction in *Aquary*.

In the 15. year of *Richard* the 2d. and in the year of God 1391. the King being displeased with the City, arrested the *Mayor*, and Imprisoned him at *Windsor*; the Liberties and Franchises seized into the Kings hands, the Authority of the *Mayor* utterly ceased, and the King appointed a Warden to govern the City, &c. This was upon the last Conjunction in the Airy Triplicity, and being 8 years or more, after the Conjunction in *Gemini*; the Superiors were near their Opposition.

Astrological Observations, 1684.

In the year of our Lord, 1450. and in the 28th. year of *H. the 6. Mortimer, alias Jackcade*, called Capt. Mendal, made an Insurrection and Rebellion, which gave a great trouble to the Nation and City of *London*, upon a Conjunction in *Cancer*, and about the Square. *Thomas, Bayard Faulconbridge*, gave the City no little disquiet, *Anno Domini 1471.* and in the 11. year of *Edm. the 4.* by a sharp attempt (to deliver the Imprisoned King *Hen. the 6.*) with an Army of 17 thousand men, but his enterprize came to nothing, but destruction to himself in the conclusion This was under a Conjunction in \times being in square to *Londons Ascendant*, and about their quartile Aspects.

In the year 1553. the first year of *Queen Mary*, Sir *Thomas Wiat* made *London* the seat of his Rebellion, 10 years after a Conjunction in *Scorpio*, the Superiors by transite opposing each other from III and \times in quartile to *Londons Ascendant*.

Anno 1601. in the 43. year of *Queen Eliz.* the Earl of *Essex*, by his puny Rebellion gave *London* some trouble after a Superior Synod in *Pisces*, 18 years after the Conjunction just upon the Expiration of the watry Triplicity and 2 years before the entrance and 7 return of the fiery Trigon.

Now enters the fiery Trigon with the great Conjunction in *Sagitary*, *Anno 1603.* the opposite sign to *Londons Ascendant*, which was attended with a great Plague. Their next congress was in *Leo*, in the year 1613. and two years after a great Plague extreamly wasted the City of *London*. And before the Expiration of those twenty years, was the City molested by fears, jealousies, discontents, murmurings and mutinies, that produced such evil Effects, that are not allayed to this day; the Lord Mayor Imprisoned &c. & the whole Nation, even the three Kingdoms began to be involved in troubles; but I shall confine my self to the consideration only of the City-affairs, which I hinted before. In the beginning of the year of our Lord 1643. there happen-

ed a Conjunction in *Pisces*, which should have been (according to the ordinary course of their motions) in *Aries*; how the influence of this Conjunction affected the City of *London*, who is ignorant? several years of plague, a continued noise of War, and preparation to the same, several interruptions & subversions of her Government, The Lord *Mayors* and several *Aldermen* twice (in this 20 years) Imprisoned, which ended in a most bloody Tragedy, and fatal Catastrophy upon the Government of the Kingdom. Which providence seemed to repair under the next meeting of the superiors in *Sagitary*, again in the year 1663. yet must not *London* avoid the sting of their influence, which first was manifested with an unparalleled Plague of Pestilence in the year 1665. And the year following happened that great and dreadful Conflagration, which in 4 days-time laid the most part of that glorious and flourishing City into a confused heap of Rubbish and Ashes, to the utter ruin of thousands of her Inhabitants.

And lastly, the Conjunction we now are under in *Leo*, which is a triple and very eminent Congression. And this Conjunction being celebrated in Opposition to the Conjunction under which they gained the model of their Government, & arrived almost to the Vertical point of their Franchises and Priviledges; it is the less to be wondered, that things are at this state with the City. But rather the hand providence to be admired, that hath so wisely steer'd affairs of so grand importance, by the regular course of Nature, and Celestial Influences. Their Charter now by a Judgment upon a *Quo Warranto*, seizable into his Majesties hands, if he please to exercise his severity, and the glory and magnificence of her Government seem to be Eclipsed; it is to be hoped not much to her detriment, falling under the hand of a Prince whose nature and temperament is to shew mercy to his Subjects: whom God in his Mercy preserve.

I must beg my Readers pardon, and I hope easily obtain it.

it; that I have not collected from History the various intrigues, and occurrences of mundane affairs under the various motions of the Heavens in the several Trignons, and made rational applications to this present age; but that work it self, may an *Essay* to it, would exceed my bounds and scantling of paper; and my minute time limited for these recreative Studies, be too too overcharged; besides *Sapient qui pauca scribit.*

Of the Summer-Quarter.

THE *Summer-Quarter* begins this year on *Tuesday* the 10. of *June*, at 5. hours and 52. minutes after Noon, being the equal time of the *Suns* entrance into the first Scruple of the Tropick of *Cancer*; by *Astronomia Carolina*, the Heavens at the apparent time present themselves thus, 28. degr. and 5. min. of the *Virgine* culminates, and 2. degr. 2. min. of *Sagitary* riseth upon the Horoscope at *London*. *Mercury* and *Saturn* have most dignities in the three figures. *Saturn* leaving the sign *Leo*, saluted by *Mars*, leaving the sign *Gemini*; dissimulation about Religion and Religious affairs, Treaties, Embassies, &c. but *Saturn* signifieth a crafty cunning self-ended Generation, whose Principles and Practises are to dissemble by, and not to keep faith with those they have to do with, so it be to their advantage. — The Planets salute each other with amicable ways this Quarter. But there are two *Eclipses*, one of the *Moon*, and the other of the *Sun* in *Cancer*, of which I shall speak in its proper place. Nor ought we to be unmindful of the effects of that prodigious *Comet*, that astonished the World, in 1680. that spend themselves in many places of the World, more especially in *Tartary* the great, *Valachia*, *Muscovia*, the South part of *Swedeland*, *Westphalia*, *Piemont*, *Bavaria*, *Ethiopia*, *Arabia*, &c. and the Cities of *Hamborough*, *Breme*, *Mountferate*, *Trent*, *Salisbourgh*, *Ingolstadt*, &c. very probably those Kingdoms may severely feel the Effects of that *Comet*, in their Persons and Estates; many fair offers and pretences, but all managed by a subtil,

ij), double dealing, false-hearted Generation; without doubt this will prove a year of grand and eminent Consultation, and as famous for eminent actions and warlike exploits in many places of *Europe*. Several Princes and States of *Europe* will find themselves much disappointed in their expectations, frustrated in their hopes, betrayed by their friends and allies, which produceth much sorrow & perturbation of mind to some great Persons; and a wonderful change in the affairs of some Kingdoms and States. *Dis quibus in terris, &c.*

Of the Autumnal-Quarter.

THis Quarter commenceth with the *Suns* entrance into the Equinoctial sign *Libra*, which happeneth this year, on *Friday* the 13 of *Septem.* at 21 min. past 7 in the morn, at which time 16 degr. and 51 min. of the *Crab* culminates; and 12 degr. and 52 min. of the *Ballance* is Horoscopical. *Saturn* hath the principal Dominion of this quarter, with whom *Jupiter* shares. *Venus* seems to allay the evil Influence of *Saturn* in the house of friendship, but he is *Saturn* still. The *Sun* moves to a Conjunction of *Jupiter*, & things promise well; but smiling gleams sometimes are the forerunners of a formidable Tempest. For *Saturn* comes to Conjunction with *Mars*, on the 3 of *October*, in quartile to the great Conjunction, to the new *Star* in 1604. and in the same Aspect to the Conjunction in 1663. Therefore ought to be the more considered. The Conjunction of *Saturn* and *Mars*, (according to the opinion of Authors) signifie accidents of Wars, Contrarieties, Controversies and Quarrels. In humane signs it signifieth multitudes of Infirmities to rage among men. If it happen in any of the Angles of the year, it signifieth Contentions, Contrarieties and Wars among Kings and great Men; and such evils to continue, until they are joyned in another sign or station; the Conjunction happening in an earthly sign, signifieth Frost, Snow, and much Cold. *Venus* being near the Planets conjoyned, and almuten of the figure, it is to be hoped will some-

Somewhat meliorate their Influence: yet Saturn sharing
 in the Government and Dominion of the figure, his evil
 Influence will hardly be restrained. I mean of the figure
 of the New Moon, preceding the Conjunction. *Italy saith,*
Si quando Mars junctus fuerit cum Saturno. struet quilibet al-
teri fraudes & deceptiones, & erunt inter homines, percussio-
nes & vulnera, maxime si fuerit in signo Humano: etiam acci-
dit regi impedimentum, & labor ab homine, qui est de terra ad-
tionis illius signi in quo junguntur. When Mars shall be
 joyned with Saturn, one man shall seek to ensnare or trea-
 pan another, and there shall be among men, fighting,
 woundings and quartellings; and most of all, if the Con-
 junction happen in a humane sign. (as here it doth) also
 there shall happen detriment, trouble and danger to the
 King or great Officers, or Governours, from some Person
 or Persons, of that Country subject to the division of
 the sign in which the Conjunction shall happen. Mars his
 Influence stirs up Wars, intestine Divisions, Imprison-
 ments, Tumults, Fiering of houses, Rapines, Robberies, Vie-
 lence, Injuries, Sudden and untimely Death, violent Dis-
 eases, Eruptions and Ebullitions of the blood. &c. In the
 Air, corrupt and poisonous blasts, Thunder, Hail, Storms,
 Shipwrack, and Sudden, and extraordinary Tempests, and
 Trouble at Sea.

I shall no further enlarge. Cardan give his advice, *In*
omni Conjunctione considera locum, & quis eorum sit superior.
 In every Conjunction consider the place thereof, and
 which of the two be Superior, or be most elevated. Saturn
 having the greatest North Latitude, he is elevated a-
 bove Mars, and his Effects probably may have the pre-
 cedency. *Saturnus gravitatem frigoris significat, & mul-*
titudinem Gelu & Nebulas & corruptionem complexionis
Aeris, tonitrua & corruscatione, & fulgura, & impedimentum
ex multitudine aquarum, &c. Saturn signifieth excess of
 extream cold weather, store of hard Frosts and Rhimes,
 and a general corruption of the complexion of the Air,

Thunder,

Thunder and Corruscations (by *Mars* joyned with him) and much prejudice by a multitude of Waters; which judgment may probably be confirmed, by reason they are conjoynd near Stars of the nature of *Saturn*, *Venus* and the *Moon*; and *Venus* near their Conjunction. *Ptolomy* goes further and saith, *Accident hominibus infirmitates de frigiditate & sicco; eruntq; homines & mendaces & contentiosi. & significatur etiam ex hoc effusio sanguinis.* Men shall be subject to Diseases proceeding from cold & dry Causes, quar-tan Agues long lasting, and many lingering and Chronick diseases, &c. Men shall be subject to Lying and Contention, which may be the cause of Bloodshed or Breach of the Peace. Both the Planets are swift in motion, therefore will their Effects be more manifest, conspicuous and apparent; the Effects will principally appear in those Kingdoms and Cities, under the Dominion of *mx, x, II, 7*, *France* and her principal Towns and Cities, may probably suffer by the Soldiery, or by the Mutiny of that Monarchs Soldiers, if a Rebellion break not forth, to the Eclipsing or Diminution of the honour of that soaring Monarch; some great Man falls foully. *Spain & Portugal*, subject to strange vicissitudes and distracted Councils, and *London* escapes not the Vengeance of their Sting. — *Flanders, Brabant, &* many places of the *Spanish Netherlands*, subjected to their malignant Influence. I pray pardon me that I say no more of this Conjunction, having rather exceeded my bounds already, and I hope my Reader will pardon me for saying so much, because I expect its Effects to be considerable from the Sympathy between this and the great and lesser Conjunctions before named, which will (in time) be verified.

Of the Visible Eclipses happening this Year, 1684.

The first is an Eclipse of the Moon on Tuesday the 17 of June, 1684.

		H.	M.	S.
The {	Beginning of the Eclipse	13	55	28
	Middle or greatest Obscuration	at 14	32	22
	End.	15	9	16
				So

So that the middle or greatest *Eclipse*, as appears by the Calculation, is at 32 Minutes, 12 Seconds past 1 in the Morning.

This *Eclipse* begins in the eight house of Heaven, the Middle and End is in the seventh and *West* Angle. *Saturn* hath the Dominion of this *Eclipse*, is under the Earth. as indeed are all the Planets except the Eclipsed Luminery. An *Eclipse* in a Tropical sign, is prejudicial to the Air and present Season. *Saturn* being Lord of an *Eclipse*, causeth Corruption by reason of Cold, long lasting and continued Diseases in the Bodies of Men, Consumptions, Quartan Agues, Mortality to Old men, Poverty, Misery, Lamentation, Mortality of useful Cattel to man, &c. In the Air, Cold, Frosty, Snow, Cloudy and Destructive Weather, &c. In the Sea, bitter Tempests, sudden Shipwracks, overflowing of Seas and Rivers, unwholsomness of the Waters, on Earth scarcity of Grain, unseasonable and unwholsom Weather; the Death of old People more than ordinary, Malice and Controversie among the vulgar sort of People; and such like, which my Scantling will not give me leave to Epitomise, only *Proclus* saith, *Suggillationes in homines movet, praestantibus alicujus viri perniciosum eadem ostendit.* It moves slanders and false Aspersions against men, and declares an untimely Death unto some eminent person.

Moon Eclipsed December, 1684.

	H.	M.	S.
Beginning	9	3	22
Middle or greatest Obscuration	at 10	40	27
End.	12	17	30

The beginning of this *Eclipse* is just upon the cusp of the eleventh house, the Middle is in the Mid-heaven, and the End is just entered the ninth. All the Planets are under the Earth; *Saturn* is in the subsequent Angle, the Ascendant lately in quartile to the Lord of the house, *Mercury* and he posited in *Sagittary* in the fourth. So that the nature of the Effects must be something of the

the nature of *Saturn*, as I before hinted, for I must be very concise. Moreover, Authors say, that an Eclipse in the watry Triplicity, presages a Rot or Consumption of the Vulgar sort of people, Rumors, Seditions, and Expectations of Wars, destruction of water-Fowl, great inundations, and overflowings of the Sea-banks. In *Cancer*, an Eclipse causeth a rottenness or corruption in the fruit when it is gathered, occasioning Surfeits, and Sickness unto such as eat them, Sea-fights, long and dangerous Navigations. *Proclus* saith that an Eclipse of the *Moon*, in the first decanate of *Cancer*, wholly excites mens minds unto War, Treachery and Apostacy.

Of the Eclipse of the Sun, 1684. July 2.		H.	M.	S.
The {	Beginning	of the		1 56 36
	Middle or greatest obscuration	Eclipse		3 10 50
	End	at		4 10 1

This Eclipse begins in the ninth house, the Middle and End is in the eighth house. *Saturn* and *Venus* are in the ninth, or rather upon the cusps of the tenth: *Jupiter* in the tenth; *Mars* and *Mercury* in the ninth, in *Cancer*, near the Eclipsed Luminary, and may all claim a share in the Dominion of the Eclipse. *Mars*, as being Lord of the Ascendant; *Mercury*, as Lord of the tenth, *Saturn* and *Venus* being on the cusp, and *Jupiter* being in the tenth house. Some there be, that do attribute great virtues and benign Influences from Eclipses, when the Fortunes have any Dominion; for my part, I am not of that Opinion; but that rather the Fortunes may alleviate or abate the evil Influences. *Mars* his great heat causeth corruption: he stirs up Seditions, Tumults, Imprisonments, Frowns of Princes upon their people, Condemning and Executing of many; Fevers and Diseases from hot Cholerick humours; great Men subject to Tyranny and Violence: Soldiers to Firing, Rapines, Plundering, and such like Exorbitances. The Air to Winds, Hot and Pestilent Thunder, Lightning, &c. Storms at Sea, and Violent blasts, with sudden Shipwracks,

wracks, corrupts Rivers and Fountains: destroys the fruits of the Earth. dissention amongst Kindred, and undutifulness among Children. Mercury being joyned with Mars, and assimilates his nature; however he excites Violent motion, Celerity, Craft, and Industry in humane affairs, causeth the Ptifick, Shortwindedness, Consumptions, Alteration in Ceremonies, Heresies and Schisms in Religion; Controversies about Laws and Customs, Detriment to Kings Revenues. In the Air high Winds, his occidencality hindereth the growth or increase of Rivers: this is but a hint of what Effects Authors have attributed to the Planets Dominion; to this you may add what I said of Saturns Influence on the first Lunar Eclipse. Proclus saith, that an Eclipse in the last face of Cancer, emits the *Great* or *French-Pox*, among the people under that sign; many other Diseases, and Seditions. It signifieth also corruptions of humors in the Stomack, as brings Consumptions, Dropies, &c.
